QL-570 & QL-580N Label Printers

simply professional
QL LABEL PRINTERS

Brothers QL Label Printers have taken label printing to a new level. Whether you need one or many labels, they are fast, versatile and print labels directly from your PC or MAC. Direct thermal printing eliminates the need for ink and toner.

Label design software

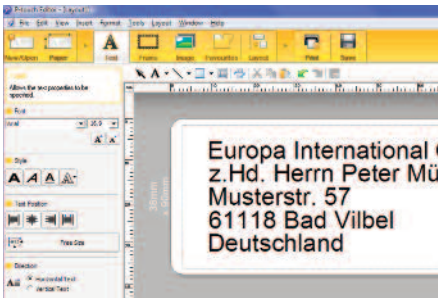
Print labels directly from Brother's easy-to-use labelling software

Included in the box with all our Brother Label Printers is our sophisticated labelling design software - free of charge! This software is very easy to use and is perfect for both novices and experts. Brother's powerful label-editing software lets you easily create simple labels, and also helps you design highly customised labels with barcodes, tables, images, logos, automatic time and date and a lot more.

Snap mode

The simplest solution available – ever – for printing professional-looking labels.
① Write the required text for your label in the Snap function ② And click print!
That's it. Professional-looking labels are that quick and simple.

Express mode



Brother also knows that sometimes you prefer to print a more customised label with frames, images, screen grabs, logos or similar to get an even more professional look. This type of label can be created easily using the Express mode of the Brother software. Express mode gives you access to all the main functions for creating personalised and professional-looking labels, displayed in a very easy to understand way.

Professional mode

For users who require even more specific and customised information to be presented on their labels, such as barcodes, tables, sequential numbering and more, the Professional mode
is the perfect option.

The Professional mode is more advanced than the Express mode, and gives you access to an extensive range of professional features in an easy to understand way.

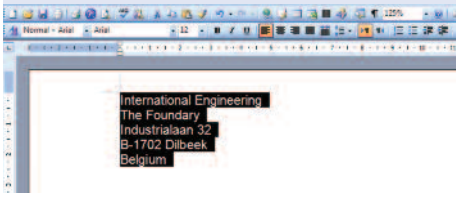
Integration with Microsoft Office

Print address labels directly from Windows versions of Microsoft Word, Excel and Outlook.

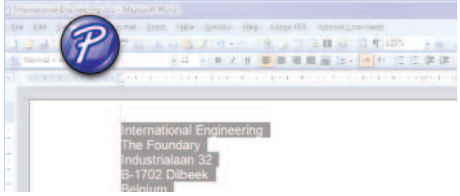
Most organisations use Microsoft Office to create letters, and store frequency used addresses or other information.

When the supplied label editing software is installed, you can choose to add a special "P" icon to your Word, Excel and Outlook toolbars. After typing a letter into Microsoft Word for example, quickly print your address label using three easy steps:

Simply highlight the text you want to appear on the label



Click the P-icon on your tool bar



Your label is printed and automatically cut to size

GREAT VAL
EXCELLENT Q

The need for labelling

Brother Professional Label Printers make life easier for office workers, administrators, accountants, hospitality and event managers - and anyone wanting to stay organised:

① Improve your professional image

Clearly labelled documents and items offering a clean and easy-to-read look help give you the professional image you need when communicating with your customers, your clients and your colleagues.

② Increase your productivity

A structured, organised and efficient working environment increases your productivity and helps you grow the business. Make your working life easier with clearly labelled documents and items.

Professional Label Printers for the office

The QL-570 and QL-580N Professional Label Printers are the newest additions to the Brother range. They combine ease of use with the highest quality specification.

High quality label printing

The QL-570 and QL-580N Professional Label Printers are designed to fit neatly onto your desk without occupying much space, and they connect easily via USB to your PC or Mac. Their high print resolution makes them perfect for printing quality logos, images, and text onto your labels. You can easily create highly professional labels for documents, files, divider tabs, folders, name badges, signs and more.

Durable automatic cutter

The durable heavy-duty cutter makes these label printers suitable for printing many labels one after another, and printing small batches of labels for later use.

Network ready

The QL-580N is also network-ready, allowing everyone in the office to print labels from the same printer. Everyone can benefit from becoming well-organised with neatly labelled storage areas, projects, and desk spaces.

Brother DK labels are designed for a wide variety of uses. There are endless possibilities when using Brother labels. Here are just a few examples:

	Before	After
Spine labels Brother's continuous-length labels come in various widths, so you can easily create the correct size labels for your filing system. Which makes it easy for you to find the right folder!		
Address and shipping labels Address and shipping labels in various sizes give a professional look to your company's outgoing mail.		
CD/DVD labels Give your CDs a professional look, with Brother's pre-sized CD/DVD labels. Neatly printed text is easier to read than a handwritten label.		
Paperwork By labelling your paperwork and project materials with relevant information such as the project stage, client details or date of completion, you can have an easier and more efficient working life. In this example, we used a 24 mm round label and a small address label. But you can create any type of label you want, using either pre-sized or continuous-length labels.		

QL-570 & QL-580N
Professional Label Printers

	Specification
Power Requirements	Internal power supply - 220-240V AC
